Welcome

Welcome to Carnoisseur '87 and yet another bumper edition.
Over the past year we have tested and inspected hundreds of products in order to bring you the latest and best available.
That means that you can choose with confidence, and you'll find our service is designed to match the quality of our products.
In short, our philosophy is to marry our enthusiasm for quality car accessories with the efficiency and helpfulness of modern retailing.
Think of Carnoisseur '87 as a tool to help you gain the most from your motoring, and let us make it work for you.

THE CATALOGUE PRICES
Please note that our prices EXCLUDE VAT. All prices in this catalogue are correct at the time of going to press at March 1987 and our priority is to negotiate with our suppliers to keep prices constant for as long as possible, however, price adjustments may inevitably have to be made and therefore we reserve the right to alter prices without prior notice.
(Suggested and Recommended Retail Prices include VAT)

BUYING BY MAIL ORDER
Everything you need to know about buying by mail can be found on the special Order Form section at the back of this catalogue.

BUYING BY TELEPHONE
Credit card holders can telephone their orders direct by phoning **Luton (0582) 471700** (24 hour answering service).

THE WAYS TO PAY
1. Cheques. (Please do not send cash through the post).
2. Postal Orders.
3. Credit Cards. We accept the following credit cards: Visa, Access, American Express, Diners Club.

CARNOISSEUR SERVICES
Customer Advisory Service: Enquiries and product information can be answered by telephone on LUTON (0582) 471700. Also a 24 hour answering service will accept your message any hour of the day or night and your enquiries will receive our prompt attention. Export enquiries are welcome. Please write for details and quotation.

TRADE DESCRIPTIONS
Every care has been taken to ensure description and specifications are correct at time of going to press at March 1987. We must, however, reserve the right to alter prices and specification without notice as circumstances dictate. Although the colour printing in this catalogue is a good representation, slight variations must be expected. All products are offered subject to availability.

THE QUEST FOR AERODYNAMIC PERFECTION

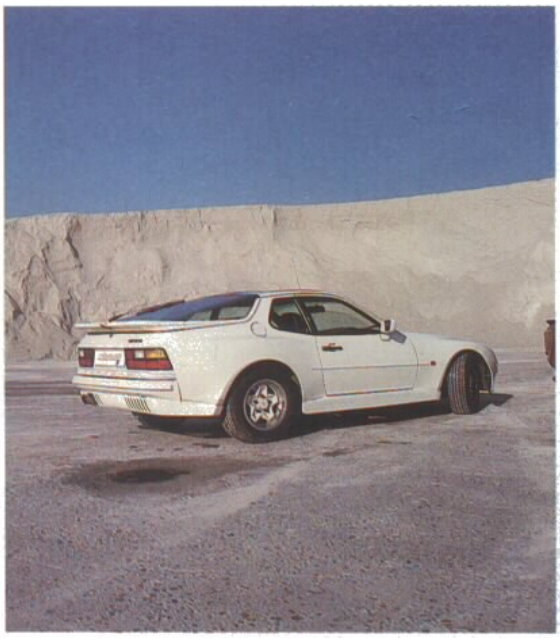
In the constant search for cost effective ways to reduce fuel consumption and raise performance, motor industry research engineers have identified just three key areas in which some advance can be made on the cars of today. Reducing overall weight and the development of more efficient engines are two fields in which we can expect a long haul of small improvements stretching well into the next millenium. But immediate gains are being made in the field of aerodynamics.

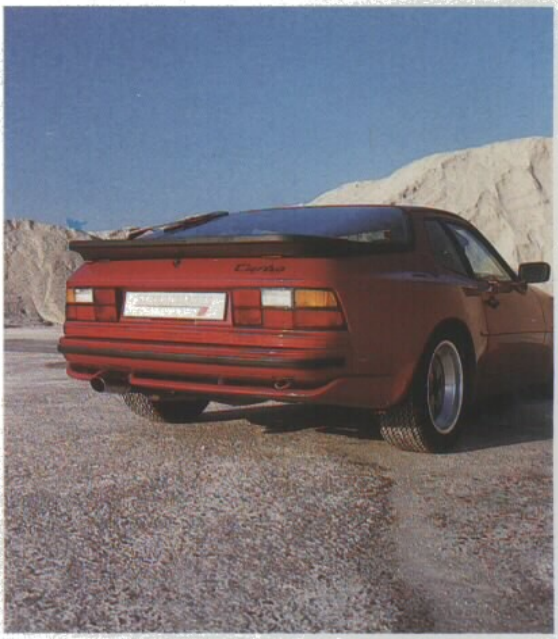
By buying ready-made front and/or rear spoilers that have been specially designed for specific makes of car during, cumulatively, many years of stringent wind tunnel and dynamic testing. Each spoiler is profiled to fit accurately on to your car's bodywork in the optimum position for the best aerodynamic results whether you are looking for improved fuel economy, a little extra performance or more predictable high speed handling. What you also get is an immediate improvement in styling distinction — spirited looks that set the car, however many there are on the road, apart from the crowd. Spoilers are functional as well as fun, and they're also the key to the motoring look of the 1980s, the art of customising by colour co-ordination.

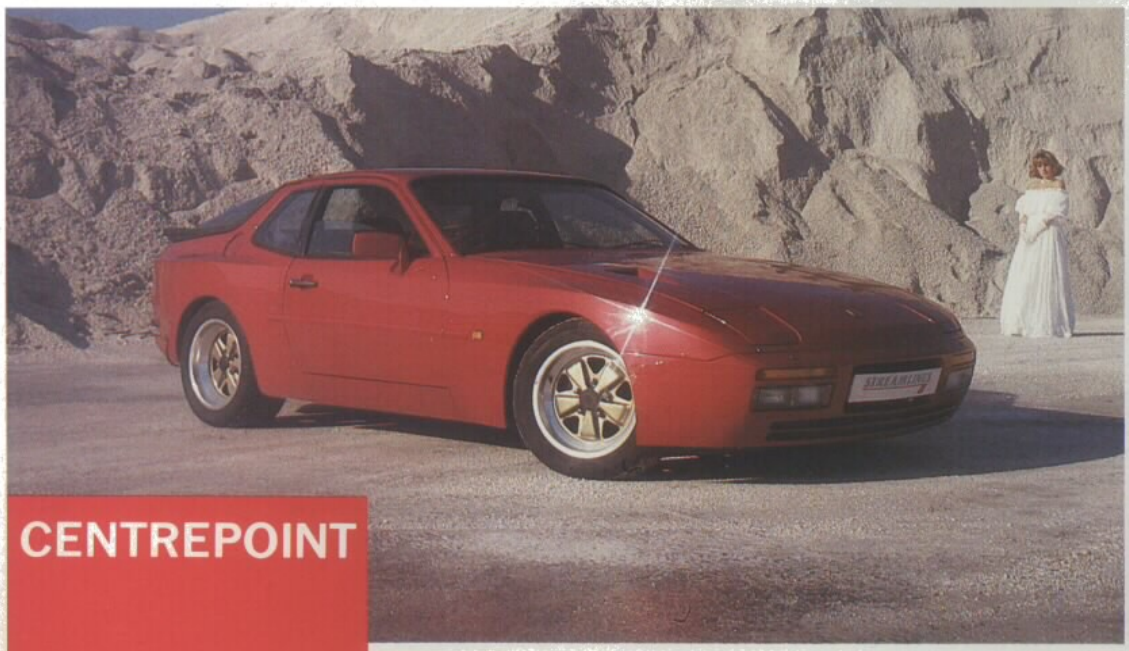
By remodelling the car with the simple addition of effective spoilers and other cosmetic aids, such as wheel arch flares and side skirts and wheels, you can take a step up-market at a fraction of the cost of buying a piece of mass-production exotica.

HOW THE SPOILERS WORK

The crude shape of many cars is not dissimilar to that of an aerofoil. It has a relatively flat underside and, roughly speaking, a curvature of its upper surface from front to rear. However, it varies from aerofoil in three crucial respects. Firstly, the last thing that you want a car at speed to do is lift. At the front lift relieves pressure on the tyre's contact patch with the road, lowering adhesion and affecting the steering (and the traction of front wheel drive models). At the rear traction may be lost and the lowering of adhesion may provoke oversteer. Secondly, the car's underside is not a perfect surface. The wheels are a major cause of air resistance, and the uneveness of flow around the engine and transmission parts further increases drag. Finally, the tendency of designers to chop off the rear of the car at the boot-lid — especially marked in some hatchback and all estate designs — creates an area of air turbulence immediately behind the car, which is yet another addition to aerodynamic inefficiency. Front, or chin, spoilers work in two respects. As an air dam they limit air flow underneath the car and spill it around the sides of the vehicle to avoid the drag on the wheels. A slight projection forward creates a small amount of downward pressure on the car's front suspension, sufficient to counteract any tendency to lift. The effect is small, even at high speeds — perhaps a maximum of 50 pounds weight equivalent — but it is very significant at the limits of the car's adhesion. At the rear the aim is twofold. Again, it is sometimes necessary to provide additional pressure on the rear suspesnsion for improvements in handling, but for many cars it is more important to reduce the amount of air turbulence in the area immediately behind the boot or tailgate. The turbulence exists because the airflow over the car becomes "attached" to the body surface, but not so attached that it can follow the sharp cut-off at the rear of most models. The result is that the detachment of the airflow is very uneven coupled with the fact that the car "pulls" along with it a small area of low pressure into which the airflow is drawn. Better debign of the body can reduce the low pressure area enormously, but on an existing body the aim is to detach the airflow much more cleanly and substantially reduce the turbulence. it is therefore, usually necessary to mount the spoiler very close to the actual point of detachment on the roof or bootlid.







STREAMLINES

Update your Porsche with this new range of high quality bodystyling parts.

- Manufactured in West Germany, the spoilers are made from PU-RIM to produce flexible parts just like the original equipment.
- As well as dramatically improving the look of your Porsche the Aerodynamic design will also improve its' high speed handling and stability.

BBS AERODYNAMICS

BBS aerodynamic parts allow owners to increase their vehicle's performance - at the same time making a statement of individuality and style.

BBS aerodynamic styling is classical, born of the laws of the air flow, yet beautifully matched to each vehicle's distinctive look. Each aerodynamic design is wind tunnel-tested to optimise efficiency.

All BBS components are constructed from reaction injection moulded polyurethane which retains elasticity even under extreme temperatures. Slight impacts are effortlessly absorbed without deforming the original shape. All BBS aerodynamic parts are chemically pre-treated, tempered and primed with a neutral coloured elastic primer to guarantee optimal paint adhesion.

With BBS you're out on your own.

KAMEI BODYSTYLING

Kamei Spoilers are manufactured from DUROKAM, a high impact lightweight co-polymer material, specially developed by KAMEI. The advantages are:

- Increased impact resistance
- Dimensional stability
- Exact fitting
- Easy to paint

The impact resistance and dimensional stability have been clearly demonstrated in extensive tests.

Golf 2 Styling Kit

HELLA SPORT

The DE Golf — State of the art technology and a real eye-catcher! The Hella DE Golf set will transform your Golf.
The kit comprises 4 main elements.
The DE headlamp and Grille set; with two main beam headlamps in place of the two original single lamps on the Golf. the triaxial ellipsoidal dipped beam headlamps project a beam by a system of lenses, producing a wider more evenly spread light pattern, with a razor sharp cut off, to eliminate back glare

Body-Styling

STREAMLINES

Introducing an exciting new range of co-ordinated bodystyling parts for you to tailor the look of your Mercedes to match your own individual style.

Starting with wings, spoilers and sideskirts you can add sleek SEC style mouldings to the lower side panels and go on to replace the radiator grille (you can either fit the new grille into your existing housing or use our plain housing ready for colour coding).

A unique feature of these bodykits is that they fit to the cars' original mounting points, and require absolutely no drilling of the bodywork, ideal for company and leased cars!

LAZER SIDE SILLS

A new, exciting and individually tailored accessory kit with both attractive and functional qualities.

- Manufactured from tough, rigid ABS plastic.
- Protects the sills and lower arches from stone chips and the resultant rust.
- Designed specifically to streamline wheel arches and reduce drag.
- Can be spray painted to colour match your car.
- Kit contains 2 Side Sills and on certain models, quarter panels which are secured behind the rear wheels.

STYLING KITS

- These attractivce and functional Styling Kits are designed for the discerning motorist who wishes his car to 'Stand out from the crowd'.
- The Styling Kits are a combination of Front Spoilers, Rear Spoilers, Wheel Arches and Side Sills, and can be purchased individually or as a complete kit.
- All parts are manufactured from high impact resistant ABS plastic with the exception of the Rear Spoilers which are in Semi-Rigid Polyurethane.
- The complete kit can be sprayed to colour-match your car, or left in contrasting black if required.
- Kits come complete with comprehensive fitting instructions, and are easily fitted.

BODY STYLING KITS

The AUTO-PLAS range of styling kits are well suited to the needs of today's style conscious motorist.
These kits not only look good, but also complement the existing range of AUTO-PLAS accessories to give that toal individual look that sets your car 'apart from the crowd'.

- Individual styling for specific cars ensures good body fit.
- Manufactured from durable A.B.S. for reliability and easy spraying.
- Body Styling Kit comprises of front spoiler, side sills and rear valance.
  N.B. Please state exact make, model and year of car when ordering.

	R.R.P.	Our Price
Ford Escort III Body Kit		
BSK 1001	£218.50	**£139.95**
Ford Sierra 1.3 and 1.6 4 door Body Kit

Ford Granada II Body Kit		
BSK 1101	£333.50	**£199.95**

AUTOPLAS REAR SPOILERS

The Auto-Plas range or rear spoilers are designed to not only enhance the appearance of your car, but to also increase the fuel efficiency. Manufactured in one of the industries most modern factory units, they are of semi-flexible polyurethane which meets worldwide safety requirements, and has a pleasing "feel" to it. Each spoiler is individually matched to a specific model, thereby ensuring an aesthetically planned image.

AUTOPLAS

Body-Styling

More and more discerning motorists are realising that a visor does something for what would otherwise be just an ordinary car. That something is style, and we feel that you will appreciate this opportunity to obtain one of the most exciting accessories on the market.
On the practical side visors protect your rear seats and passengers from the sun, and help keep the interior cool when parked in the open. A clear rear view is maintained by aerodynamic flow deflecting rain and dirt off the rear window, and even in winter, frost and snow fall on the visor not on the glass. Ample space is allowed for cars with rear wipers.
Rear Screen visors are available for almost any car and are designed, developed and made in England by Auto-Plas, a leading European auto accessory manufacturer. Fitting is simple, with no drilling or screwing required, and the visor is securely retained under all conditions, even through a car wash. Complete the order form stating clearly your car's make, model, year of manufacture and specify whether rear wiper is fitted.

Wheels

ALLOY WHEELS — A MARK OF DISTINCTION

There's no motoring accessory that marks a car so far apart from the common horde as alloy wheels. With their unique combination of styling flair and purposeful performance image a set of alloys is the signature of a car of sophistication. That may be your sole

purpose for a purchase of wheels but you should also be aware that these finely engineered pieces of hardware, produced and tested by ultra-modern techniques, have some considerable practical value. First there's the weight saving over cheaper production steel wheels. This gives small fuel economy gains and a little bit of extra performance but the major advance is in the reduction of unsprung weight which can show improvements in ride and handling characteristics. And new wheels also open up to you the possibility to change tyres — perhaps the greatest leap forward in handling, steering response and braking that you could make would be a switch to the latest ultra-low profile designs pioneered by Pirelli's renowned P7 and P6 types.

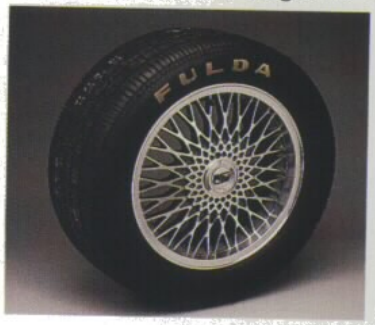
SELECTING THE RIGHT WHEEL AND TYRE

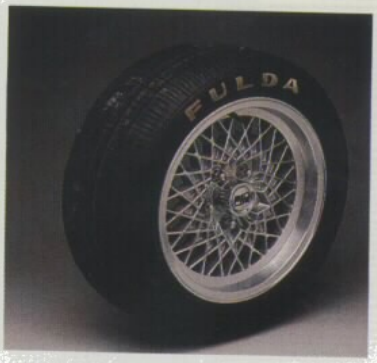
There are two critical measurements to be made in matching an alloy wheel to your car. The type of wheel stud fitting is a combination of the number of studs (4 or 5) and a measure of the diameter of the circle drawn through the centre of the stud holes (known as the PCD). The wheel offset and whether it is a positive (inset) or negative (outset) dimension is also important (see diagram). But don't worry too much if you are simply replacing your existing steel wheels by alloys of the same dimensions. Our comprehensive reference service will give you the exact model application you require. To step up to a wider wheel or, possibly, a larger diameter in conjunction with lower profile tyres you may need to take some expert advice — it is a service we are only too glad to offer.

Selecting tyres is considerably more complex. You must always bear in mind that the lower the profile of the tyre you would like to use the greater the wheel diameter may have to be to preserve the same rolling diameter so there is no change in the car's overall gearing and the speedometer and odometer remain reasonably accurate. But to take full advantage of lower profile tyres the tyre and rim width must be increased. As there is a limit to the clearances under the wheel arch great care should be taken to ensure that the tyre is not too wide.

Only careful cross-referencing between the wheel application list and the catalogues of the tyre producers will reveal the maximum tyre and wheel size that any model of car can take without extensive modification to bodywork or brake and suspension configurations.

Note that the profile of a tyre (also known as the aspect ratio) is an expression for the ratio between tyre height (from bead to tread) and tyre width. Standard tyres are approximately 80–85% profile, earlier lower profile designs now in widespread use are 70% while the latest ULP designs like the P6 and Dunlop D3 are 60–65% profile. The lowest profile of all is presented by the very specialised P7 design at 50%.





THE ADVANTAGES OF ULP TYRES

The breakthrough to lower profiles than 70% was made by Pirelli, a company whose researchers recognised that energy absorption by the tyre could be reduced if the tyre height was reduced and the reinforcement of the tread area made extremely strong. This limits the flexibility of the sidewall and improves steering response. The fact that the tyre is wider gives enormous improvements in grip both for braking and roadholding as well as resisting breakaway under hard acceleration. The P7 tyre was the revolutionary upshot of this thinking but to gain much wider appeal it needed the P6, a tyre that can be mass-produced and used successfully on lesser machines. Most other major tyre manufacturers now produce ULP tyres with profiles in the 60–65% range.

BBS WHEELS

BBS, quite simply — the best money can buy. These precision engineered German wheels are fitted as original equipment on some of the world's most exotic cars. Their pedigree of excellence has been moulded through years of motorsport successes. With BBS you're out on your own. The 1987 range comprises three similar styles constructed from three very different technologies:

RS Wheel — three piece modular rim
The ultimate of all road wheels, it is a direct development from the BBS racing rim. The centre section is made of forged aluminium as are the cold rolled inner and outer rim halves giving superior strength and lightness of weight, RS wheels are supplied with either silver or gold centres and polished rims.

RG Wheel — Single piece forged rim
State-of-the-art technology from BBS. The forged RG wheel is pressed into a single piece from a specially developed alloy and then formed under 14 million pounds of pressure. The result is a wheel of the highest density, increased load capacity and exceptionally light weight, RG wheels are offered only in exclusive platinum finish with polished rim.

RZ Wheel — Single piece cast rim
The latest development of the BBS pressure die cast range or rims. The RZ incorporates the new centre lock styling first introduced on the modular wheels. Colour options include silver, silver face with polished rim and gold face with polished rim.

M.S.W./O.Z. WHEELS

As supplied to Lamborghini and the Alfa-Romeo Formula One Team. M.S.W./O.Z. Wheels are manufactured in Italy to meet all international safety standards. All wheels are supplied complete with nuts/bolts ready to fit.
All wheels undergo dimensional and radioscopic checks and must pass tubless tests.
Along the manufacturing line, destructive tests such as stress test (bending test), SAE/cornering test, rolling test, salt spray test, are carried out on wheels chosen at random.
Before coating, the wheels enter surface treatment tunnel to protect the metal. A proper anti-corrosion prevention is performed using de-greasing process, phosphochromatation, final rinsing by demineralised water.
Finishing is diversified, coating technique varies using both liquid and powdered lacquers, alternatively or in combination. M.S.W./O.Z. Quality assured.

BILSTEIN

The name Bilstein is synonymous with sporting character and unbeatable roadholding. Bilstein suspension kits are designed to give maximum performance whilst maintaining a safe reduction in ride height. The sports kit contain specially tuned shock absorbers matched to the reduced height of the springs and where necessary include modified rubber bushes for the axle mountings.

Exhausts

JETEX EXHAUST SYSTEMS
Technology, Quality, Performance
with a sound that calls the tune

Jetex Exhaust Systems are manufactured in Sweden. Production takes places in a new purpose built facility.
With Jetex Exhaust Systems the engineers have concentrated on solving a number of a technical problems. A thorough programme of testing performance, fuel economy, noise and exhaust levels as well as back pressure to name a few have provided answers which give advantages in all of these areas combined with durability and purpose designed packaging.

General
Two basic methods can be used to dampen exhaust noise — absorption damping and reflection damping. The reflection method is cheaper as a rule, and technically easier to construct, but it has side effects among them high back pressure which reduces power output and frequently increases fuel consumption. Absorption damping, however, while being technically more complicated to manufacture, has the advantage that the exhaust gases are removed effeciently so that neither performance or fuel consumption are affected. Jetex Systems are of the absorption type.

Performance
Performance testing is carried out using computerised chassis dynamometers thus enabling different theories to be examined before deciding on the final design. Other important factors taken into consideration are back pressure, carbon monoxide levels, inlet manifold temperature and fuel consumption.

Noise Levels
It is a common misconception that sport systems automatically mean more noise with Jetex designs the noise levels are always below the legal maximum, and comply with the officially approved noise levels for motor vehicles. All systems with the E prefix comply with the E.E.C. regulations.

Jetex systems at a glance:
- Swedish high quality steel
- Reduction in back pressure up to 82% for some applications
- Professional design
- Pleaseant exhaust note
- Improved output compared with standard systems
- Easy to assemble
- Complete systems (unless original front pipe is indicated) with fitting kits
- 12 months guarantee
- Every Jetex system is boxed

TARGA TRIMS

- Add a modern style to your standard 12, 13 or 14 inch steel wheel
- Made from high impact-resistant plastic and finished in white or silver
- Matt black hubcaps complete the effect
- Simple clip-on fitment
- Easy to maintain
- To obtain the best effect from Targa Trims, the centre of your standard wheels should be sprayed black.
- Targa Trims come attractively boxed in sets of 4
- Not for use on alloy wheels

UNIVERSAL REAR SPOILERS

These aerodynamic spoilers are available in four widths to suit most makes of car. An ultra-smooth finish means the expanding polyurethane spoiler can be spray-painted to match any car colour, and there's no need to drill any holes, as they have a strong, self-adhesive backing for easy and secure fitting.

SOLARPORT SUNROOFS

SOLARPORT OLYMPIC

- Big value 30" x 15" Block Screen Printed Toughened Safety Glass Panel, manufactured to British and European safety standards.
- Twin tilt positions. With the twin position handle, the Solarport is the ideal solution to draft-free fresh air motoring, whether it be on the motorway or running around town.
- Easy, safe one-handed operation. Opening and closing the sunroof is a simple one-handed movement, and with the simple quick-release mechanism the glass panel can be easily removed to give open air motoring.

SP2001 **Our Price £59.95**

SOLARPORT IMPERIAL

- Large 33" x 19" Bronze Laminated Safety Glass Panel.
- The ultimate glass sunroof.

SP2002 **Our Price £89.95**

All Solaport Sunroofs carry a 24 month guarantee covering all parts and manufacture to ensure absolute satisfaction.
Solarport Fitting Instructions, Templates and Sealants are all included for the competent D.I.Y. enthusiast to install it himself. Alternatively we can recommend a local sunroof fitter to carry out the installation at reasonable cost.

Exterior

EECO TOWING BRACKETS

Made from high quality steel, designed to be neat and unobtrusive with the D.I.Y. fitter in mind. Over 500 applications to fit most British, Continental and Japanese cars from 1971 onwards.

If your car is not listed please telephone for application and price details.

When ordering please state make, model year of car, and whether saloon, hatchback or estate.

Seats & Interior

DRIVERS' SEATS — NOT SO HOT

According to one leading orthopaedic specialist there's not one car on today's market that has a completely well-designed driver's seat. And that's why more and more serious drivers are turning to the accessory seat market for relief from stress at the wheel, leg muscle cramp and — by far the worst side-effect of long hours spent in unsuitable seating — low back pain. The criticisms of car seating made by the ergonomics and medical professions are simply summed up — too much emphasis on sumptuous style and eye appeal, too little on human anatomy. They point out that there are far more muscles involved in motoring than the turn of the wheel and the press on a pedal would suggest. The car is a constantly moving base for a seat. There are the relative movements of car and driver in response to acceleration, braking and cornering and there is the ever-present reaction of the car to the road's surface. All these movements are transmitted to the person behind the wheel and may be compounded by the spring rate of the seat itself. But the human body has many mechanisms which aid it to stay relatively still in a constant relationship to the car's major controls. And these mechanisms all actuate muscles which are in a constant state of tension to resist unnecessary body movement. The result of this constant tension is cramp affecting legs, muscles of the back and occasionally those of the shoulder. And that's not all that the experts find wrong with the hot seat. Most car seats have a relatively hard leading edge which interferes with the soft tissue structures behind the knee. These include blood vessels and tissues carrying nerves. Restricted blood vessels and pressure on nerves add to the problems of muscular cramp. But by far the worst of the condemnations made against original equipment seating is that very few designs actively encourage the body to adopt a naturally therapeutic posture at the wheel. Correct posture is when the spine conforms to a shallow S shape. Many car seats fail to provide adequate support in the lumbar region, which bows backwards, a slouch which may be made much worse by a poor relationship between seat and wheel. Finally, say the orthopaedists, the seats are not properly shaped to accommodate the ischial tuberosites — in plain man's language, the bones behind the flesh of the buttocks. These mechanical stress points take almost 90% of the body weight while you are seated at the wheel.

The problems that arise from long hours behind a wheel in poor seating vary from the vague lack of comfort to the provocation of back pain. The main areas of concern are the fact that muscles fighting against body movement go into cramp (a condition that can be exacerbated by the back becoming too warm and then suddenly cooling when the driver leaves the car), the dreadful posture that drivers adopt, fatigue and numbness of the buttocks and pressure on blood vessels and nerves that restricts circulation in the leg and again causes numbness. All these factors contribute to bodily and mental fatigue, lower the driver's concentration and increase stress. In cases where the driver has an existing low back problem from disease or injury standard car seating can be a cruel extension to daily torture.

ACCESSORY SEATS — CLOSER TO THE IDEAL

"Almost all replacement seats are in one respect or another better than the standard item fitted to most cars — and that's regardless of whether factors like the attitude to the wheel or the offset of the pedals is wrong". These are the words of an orthopaedic specialist in industrial, vehicle and aircraft seating. The fact that this is so stems in part from the origins of many of the available accessory seats. Many of the designs were bred in the rough tough world of competition motoring — sport in which the driver is subjected to the most severe of buffeting experiencing forces far higher than you would ever expect to find in everyday motoring. Under these conditions, often endured for very long hours in rally events, the driver must be retained securely enough to control the vehicle accurately, and the seat must keep the driver comfortable to minimise fatigue and stress.

Few everyday motorists would find it convenient to shoe-horn themselves into a competition bucket which, with its hard shell, firm, thin cushioning and well-defined posture shaping, comes close to the experts' ideal seating form. The alternatives are ranges of accessory seating which have considerably less constructive side cushion designs but all the other desirable features of the bucket. All the ranges have firm cushioning to maintain the body in a good posture, there's a pronounced well in the cushion for the buttocks, good thigh support and, often, provision for extended rearward seat travel. The best feature of many seats is the excellent lumbar support. On at least one model in each range this is adjustable — either mechanically or pneumatically — for both height and firmness or protrusion. Seats are available in both fixed and reclining designs and there is a wide choice of upholstery fabrics, colours and styles.

WILL THEY FIT YOUR CAR?

Accessory seating is one of the easiest additions to make to a car. Manufacturers have available a considerable catalogue of sub-frames and mounting kits which adopt the standard seat fittings to take the new seat or simply screw down in place of the original parts. In only a few cases is it necessary to have parts made to any special design. Remember that a good car seat is an investment in your motoring comfort and relaxation for many years to come. When you get your next car you just buy the appropriate sub-frame and the seat can be transferred to the new vehicle within minutes. The only twinges you'll feel are those of sorrow for the torture victims stuck with their standard car seat.

Schroth Competition Harnesses are fully tested to E.E.C. standards + officially apporoved for road vehicle use. They conveniently fit to your vehicles standard anchorage points.

TYPE 4003

Static Shoulder Harness, with 3 point fixing, + 4 individual adjusters

		Our Price

Steering Wheels

CK STEERING WHEELS

A truly contemporary design manufactured by West German craftsmen . . . it's an unbeatable combination!
Tested to destruction in CKs' laboratories in Bavaria, and by Twice world rally champion, Walter Rhorl, in the forests of Europe, the CK wheels' durability is well proven. And as for style, well the pictures speak for themselves.

LUCAS 20-20 DRIVING LIGHTS

The Lucas 20-20 Driving Lamps incorporate a revolutionary homofocal reflector giving brilliant central intensity as well as extra light at wider angles.
The 20-20 Fog Lamp also features the homofocal reflector, this time in a form that produces a wide, flat and extremely powerful beam.

- Completely rustless homofocal reflectors for 100% efficiency and accuracy.
- Specially treated glass lens to maintain accurate light distribution at all temperatures.
- Complete with 100 watt halogen bulbs and lens cover.

DX150 SERIES LIGHTS

The DX150 is a lamp specially designed to outshine all other lamps in its class.
Combining the power of an H3 Quartz Halogen bulb with the precision of a steel reflector, it provides extra penetration and improves vision, even in the worst weather conditions.

For easy fitment the 150 series has a narrow profiled steel body with an offset mounting bracket. This allows secure fixing in the most confined areas.

LUCAS

HELLA RALLYE 2000
— The Choice of Champions Blomquist, Mikkola, Wilson, Rohrl, and other top international rally drivers all swear by Hella Rallye 2000's. They rely on their rugged construction and superb lighting power to keep them in front of the competition when night falls. You'll rate them highly too. There's the Rallye 2000 and its equally tough, smaller companion the 1000.

RALLYE 2000

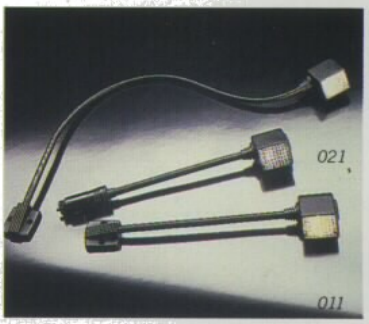
- Wide angle lens with adjusted hood
- Window, shelf or roof mounted
- Easy installation

PP 3005 **Our Price £4.95**



3rd BRAKE LIGHTS (not Hella)
This innovative product is now mandatory equipment in many parts of the world including U.S.A., Canada, Australia, New Zeland and Norway, where research has proved that it has aided a reduction in rear-end collisions by a staggering 51%. The major benefit to the motirst is that he obtains an early warning of potential trouble as the brake light is visible at eye-level, 4 or 5 cars in front of the vehicle he is following. This enables him to take early braking action, and to avoid sudden decelleration, the cause of virtually all rear-end collisions.
The unit comes complete with all necessary fitting accessories and comprehensive instructions, this providing for an easy D.I.Y. installation.
Eye-Level is manufactured to exacting standards as laid down by car manufacturers and carries the D.O.T./S.A.E. approval symbols.

AUTOPLAS

GRILLES

The Autoplas ABS front grille kit is the perfect solution to providing powerful Halogen supplementary lighting. The lamps used are Halogen driving lamps, as used by many of the world's leading car manufacturers. The kit consists of a pre-assembled grille, a special wiring loom and relay with full fitting instructions. Fitting is very straight forward and all ancillary parts are fully guaranteed.

KC DAYLIGHTERS

Incredible power. Incredible value. The KC Daylighter range offers lamps of unparallelled power. The 150 watt version generates a massive 350,000 candlepower with a useful reflective range approaching 4 miles. By contrast, the lower output 100 watt lamps gives a mere 240,000 candlepower and 1.5 miles range. KC's are available with either the traditional black housing and patented vibration resistant mounting or in Budget format which employs a more basic construction in chrome finish only. Both models use identical Westinghouse optical units. Because KC lamps were designed to use in competition they are ideal for high speed night driving anywhere. With an overall diameter of 6.25 ins, and a depth of 5 ins., the lamps are compact which allows them to be mounted easily on most vehicles. Each Daylighter comes complete with a yellow "Smiley face" cover which are also available separately. Both the 100w and the 150w lamps are completely legal for use on UK public roads but as with any auxilliary lights they must be wired and mounted in accordance with the law.

SERVOGLIDE XL POWERED WINDOWS

Once a luxury only on expensive cars, Servoglide XL now brings the safety and convenience of power operated windows within reach of the majority of motorists. It can be fitted to most cars in a matter of hours, at a cost much lower than original equipment window lift systems. Designed to be discreet and unobtrusive Servoglide XL adds style and elegance to a vehicle, while providing finger-tip control of both the driver and passenger windows. The comprehensive kit of parts includes fully illustrated fitting instructions to guide you through installation. Total fitting time should be less than a day.

- New Slimline Motor
- Centre Console Switching
- Comprehensive Parts Kit
- Fully Illustrated Fitting Instructions

the suitability of Servoglide for a wide range of cars has been achieved by incorporating the existing winder mechanism into the System. Lucas manufactured, it has at its heart a powerful 12V motor, slimline in design which means that it's better suited to working within the narrow confines of the modern car door; and through a flexible drive powers a low profile universal gearbox mounted on the window regulator mechanism. Should electrical power fail the regulator mechanism can be operated manually with the reserve handle provided.
The system incorporates centre console 'Rocker' type switches which operates the window when continuous pressure is applied to the switch.
Also included is a thermal cut-out and window limit switches, provided to ensure adequate protection during operation.

SPEEDING CAN JEOPARDISE YOUR LICENCE — AND MAYBE YOUR LIVELIHOOD

With today's modern traffic systems becoming more and more complex and with an ever increasing number of vehicles on our roads, it is fast becoming impossible to concentrate on every aspect of the road ahead. In addition, falling speed limits over recent years have forced us to drive at speeds much slower than a modern car's capabilities. These factors alone therefore can cause even the most conscientious driver to inadvertently exceed the speed limit. The Snooper range or radar detectors has been developed to help the modern driver maintain a better driving record by promoting increased drive awareness.
The Series 3 dash provides the driver with a simple Range Finder to help pinpoint the exact location of the radar source. It also features "Signal Sensor". The circuit can distinguish true radar from false signals and together with a Highway/City Selector and manual volume control for the audible warning system, this instrument provides the driver with the finest possible protection that money can buy.

Series 3 Dash
PP 3003 **Our Price £242.50**

Both the HLR and SLR medium range Snoopers provide good protection at economical prices. The SLR dash mount with adjustable sensitivity control for town and highway driving was originally tested by 'Motor' magazine, and proved to have a range in excess of 2 miles. And its remotely mounted counterpart, the HLR, has been a favourite for those drivers requiring the same level of facilities and the same protection from a hidden detector.

CRUISE CONTROLS

WHY BUY A CRUISE CONTROL?

Cruise Controls have long been popular in the United States and understandably so. Long distances, open roads and speed restrictions make cruise controls almost a necessity. But gradually, European drivers are coming to recognise that a cruise control can also be meaningful over shorter distances and in heavier traffic conditions. They have discovered that not only does a cruise control prevent accidental speeding but also reduces fuel costs by up to 15%.

HOW DOES A CRUISE CONTROL WORK?

The 'heart' of the system is a micro-processor that memorises any speed chosen by the driver and, by regulating the throttle actuator, enables the vehicle to be maintained at that constant speed.
This means that once a speed has been programmed by touching the SET button, your foot can be taken away from the accelerator pedal. Whether up hill or down dale, the cruise control will adjust the movement of the throttle and hold the vehicle to the desired speed.
For safety reasons, a cruise control does not operate at low speeds (normally not under 25 mph). It can be switched on or off at will and is immediately and automatically disconnected by pressing the brake pedal or, on manual vehicles, by changing gear. Touching the RESUME button will cause the vehicle to accelerate until it has reach the last set speed.
Cruise controls eliminate abrupt throttle movement and consequently reduce fuel consumption.

ZT14

AP90

AP90
A breakthrough in terms of price for a basic cruise control. All parts supplied for complete installation. Suitable for dash or stalk mounting. Manual transmission vehicles require optional Electronic Clutch Switch ECS4859.

	Rec. Retail	Our Price
AP90	£69.50	**£49.95**

ZT10
Features as AP90 plus:
Larger illuminated command module. For dash mounting only. Manual transmission vehicles require optional Electronic Clutch Switch ECS4859.

ZT10	£79.50	**£58.95**

AP120/ZT12
Features as AP90 plus:
Illuminated keys on control module. L.E.D. to indicate cruise control in operation. Coast Control to disengage cruise control. Electronic Clutch Switch included.

AP-20	£89.50	**£65.40**

ZT-14
This cruise control combines all the features of the ZT-10 with that of a simple driving computer. A separate module, which houses the micro-processor, provides a digital display of actual speed, distance travelled and elapsed time on trip. The trip information is automatically re-set whenever the vehicle is started. Electronic Clutch Switch included.

PERFORMANCE TIMER

A really accurate measurement of acceleration time must be what many owners of high performance cars have been waiting for. No longer will it be necessary to rely on performance figures as published by the vehicle manufacturers.
The Performance Timer calculates electronically the acceleration times of a vehicle from
0–30 mph, 0–60 mph and a ¼ mile from a standing start. It can also calculate the speed the car attained at the end of the quarter mile. After selecting the desired function, the Timer will provide an audible beep to let the driver know that the required speed or distance has been reached and that the data has been stored. Road speed can be displayed at any time, as required.
The Performance Timer is simply installed on most 12v negative earth vehicles and comes complete with fitting instructions and all necessary hardware for the DIY enthusiast.

DE-740 £76.50 **£49.95**

ZT 119

TIME AND TEMP

Another useful accessory. Designed to fit a standard radio aperture, the Time and Temp provides not only a 24 hour clock, a stop-watch and inside and outside temperatures but also an indication of battery voltage and wake-up alarm.
Time and Temp is simply installed on most 12v negative earth vehicles and comes complete with fitting instructions and all necessary hardware for the DIY enthusiast.

ZT 119 £79.50 **£58.75**

DE 700 DE 710

ELECTRONIC COMPASS

Two electronic compasses featuring the very latest aircraft type quadrature circuit for total accuracy.
Just take a look at some of the outstanding features, which make conventional compasses a thing of the past.

- Automatic magnetic compensation.

Even the most expensive conventional compasses have problems with strong magnetic fields in a vehicle. But Zemco's quadrature circuit system automatically corrects to obtain precision accuracy.

- 360° hi-tech display clearly shows the direction of travel.

Eliminates the confusion of mechanical compass rotation.

- Full colour illuminated display for easy reading day or night.
- Fits easily onto any dashboard allowing use by either driver or front seat passenger.
- Display is electronically controlled for steady, accurate reading.
- Easy to install in vehicle electrical system — or via the cigarette lighter adaptor included.

DE 700 £49.95 **£36.50**
DE 710 £74.50 **£54.45**

DE 730

WIPER DELAY

Wiper Delay provides a variable wiper interval of from 2 to 20 seconds and is equally suitable for front or rear screens.
The Wiper delay is simply installed on most 12v negative earth vehicles and comes complete with fitting instructions.

DE 730 £13.95 **£10.25**

INTERIOR LIGHT DELAY

How often have you groped to find your ignition switch in the dark? Just think how easy it would be if your interior courtesy light remained 'on' until the vehicle has been started. The Zemco Interior Light Delay makes this possible whereby an electronic delay keeps the courtesy light 'on' for 15–30 seconds after closing the car door.
The Interior Light Delay is simply installed on all vehicles and comes complete with fitting instructions.

SA401 £6.95 **£5.10**

EXTERIOR LIGHT DELAY

No more stumbling around in an unlit driveway. Just walk away from your car in the knowledge that the lights will automatically switch-off after a pre-set time of from 30 seconds to 3 minutes.

SA402 £10.40 **£7.60**

OVERSPEED ALERT

Decide the maximum speed at which you wish to travel and the Overspeed Alert will provide an audible warning when that speed has been attained.

ZM1007 £13.95 **£10.25**

ZEMCO

410

420

Zemco Auto Alarms all feature a unique integral design whereby the siren unit houses the micro-processor, the motion detector, a battery back-up and a 104 decibel horn. They offer the ultimate in protection and have been selected by a number of car manufacturers as the 'state of the art'.

What type of alarms offers the best protection?

There are many types of alarm on the market — some very cheap, others extremely expensive. They range from simple ignition cut-off switches to sophisticated ultrasonic and infra-red devices.
Generally, an alarm is passive or non-passive. What does this mean? It means that a passive system requires no actiion on the part of the driver (i.e. the alarm arms iteself automatically) whilst a non-passive system can only be armed by some specific action. Driving habits are not easily changed and passive systems are much to be preferred.
Passive alarms can be of various types. Two of the most popular are 'current sensing' and 'ultrasonic'. What is the difference? A current sensing alarm relies on pin-switches in the doors, bonnet or boot to detect entry whilst an ultrasonic alarm monitors sound reflections within the car's interior. Which is better? Experts disagree but current sensing devices have a reputation for fewer alarms.

ZEMCO ALARMS

The alarms are passive, so you don't even have to remember to switch them on. When the ignition is turned off, the system is fully armed. Smart Alarms ALL have a battery back-up system. So, even if a thief succeeds in cutting the car's battery cable, the alarm will sound loud and clear.
DESIGNED FOR EASY INSTALLATION.

SA410

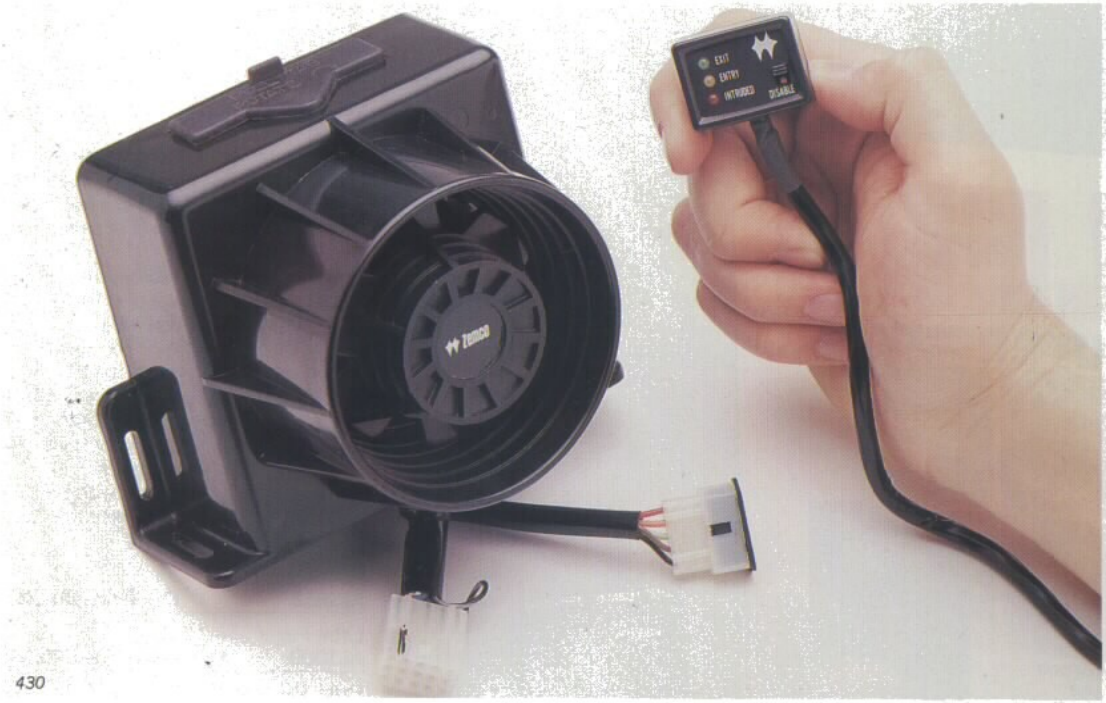
- Digital Logic Microcomputer and electronic Super Siren are all combined in one easy-to-install unit.
- Battery Back-Up protects against cutting wires or disconnecting car battery.
- Passive System is automatically armed with ignition key. No switches to hide.
- Contact Switches protect boot and bonnet.
- Entry Delay can be adjusted to suit your needs.
- Automatic Reset rearms after alarm has sounded.
- 105 dB Siren

SA410 £39.95 **£29.95**

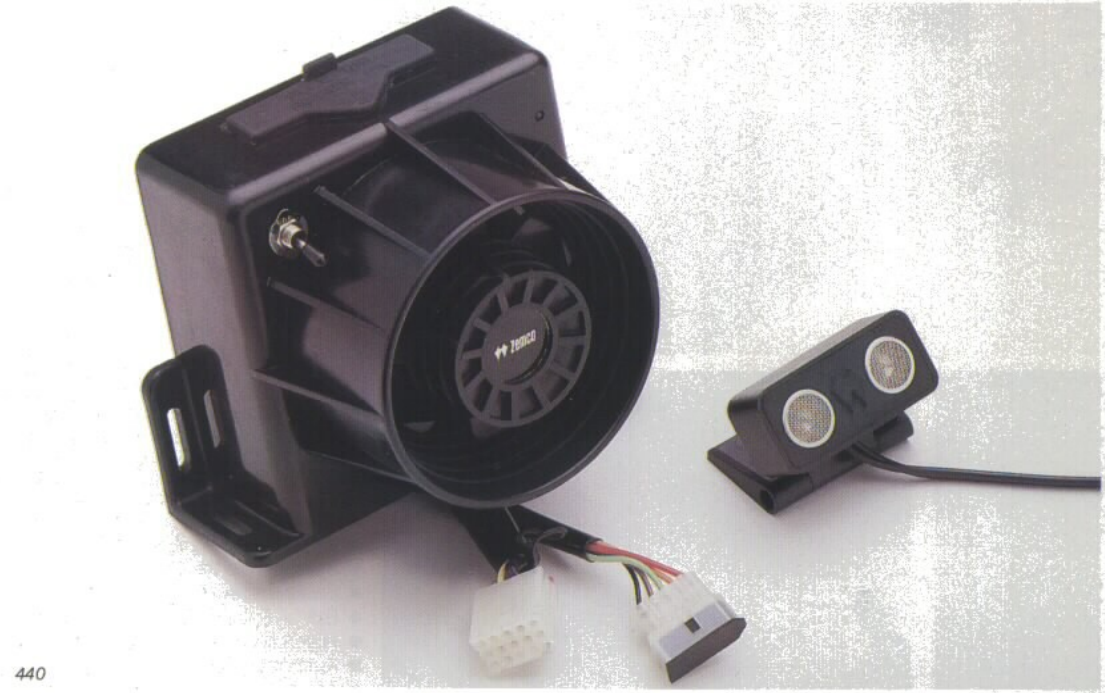
SA420

- Battery Back-Up.
- Passive System is automatically armed with ignition key.
- Shock Sensor detects towing or jacking.
- Dome Light Circuit protects interior.
- Adjustable Length Contact Switches for boot and bonnet.
- Test LED checks installation and operation.
- Disable/Valet Switch deactivates alarm.
- Retriggerable Exit Delay resets when boot, bonnet, trunk, or doors are opened during the exit delay.
- Entry Delay adjustable from 0 to 30 seconds.
- Automatic Resct rearms alarm.
- 115 dB Siren.

SA240 £49.95 **£36.95**



430



440

431 Remote

SA403 VEHICLE ALARM MOTION DETECTOR

- Guards against towing or jacking.
- Can be used with vehicle horn.
- Works with all Zemco alarms.
- Sensitivity adjustment.
- Includes On/Off switch.

SA403 **Our Price £9.95**

SA405 VEHICLE ALARM BIAXIAL PIEZZO SHOCK SENSOR

- Senses high frequency shock such as tampering with glass or wheels.
- No false alarms from wind or soft movements
- No moving parts — mounts in any position.
- Works with all Zemco alarms.

SA405 **Our Price £11.95**

SA406 IGNITION CUT-OFF SECURITY SYSTEM

- Compatible with standard, high energy or electronic ignition systems.
- Hidden switch disables entire ignition system.
- Will not damage ignition as ordinary switch can.

SA406 **Our Price £7.95**

SA430

Features:

- Battery Back-Up.
- Passive System is automatically armed with ignition.
- Shock Sensor detects towing or jacking.
- Dome Light Circuit protects interior.
- Adjustable Length Contact Switches for boot and bonnet.
- Test LED checks installation and operation.
- Disable/Valet Switch deactivates alarm.
- Retriggerable Exit Delay resets when boot, bonnet, or doors are opened during the exit delay.
- Entry Delay adjustable from 0 to 30 seconds.
- Automatic Rest rearms alarm.
- 115 dB Siren.

Special features:

- Status Monitor shows exit, entry, intrude and has a disable switch.
- Smart Exit waits for door to close before starting delay.
- Built in Ignition Kill.
- Chirptone when alarm arms.
- Warning Tone when entry delay begins.
- Auxiliary Output for flashing lights or horn.
- Outside Sensor protects ski racks, etc.

	R.R.P.	Our Price

AUTO ALERT SUPER PAGING ALARM SYSTEM

The Auto Alert System round-the-clock protection for cars, commercial vehicles, motorcycles, caravans, and boats.

If thieves tamper with your vehicle, the Auto Alert will immediately send a personal dial tone signal to a receiver that is small enough to fit into your pocket.

The super sensitive receiver has an effective working range of up to 2 miles, this will of course vary according to the terrain. The signal will penetrate even multi-storey buildings and underground car parks. The Auto Alert has a built-in siren relay that can simultaneously scare off the thieves. System includes transmitter, pocket pager peizo ceramic sensors (2), coaxial cable, pin switches, pager, batteries.

Electrical

HELLA AUTO-ALARM A (Can be combined with Auto Alarm C or D).

- Activates when doors, bonnet or boot opened.
- Prevents jump-starting.
- Activates if radio removed.
- Switched on by concealed master switch.

	R.R.P.	Our Price
5 AA 003 525-801	£61.87	**£34.95**

HELLA AUTO-ALARM B (Can be combined with Auto Alarm C or D).

- Same as Alarm A but controlled by an outside lock and safety key.
- The ignition and starter is disabled electronically when the alarm is actuated.

5 AA 005 191-801 £110.84 **£62.95**

HELLA AUTO-ALARM C (Add on unit)

- Add on unit for wheel and towing protection.
- Microprocessor memorises the position of the vehicle.
- Alarm activates if this position is changed.
- Actives if wheels removed or vehicle towed or loaded.

5 AA 005 192-801 £123.05 **£69.95**

HELLA AUTO-ALARM D (Add-on unit)

- Addon unit for passenger compartment protection.
- Transmits a protective ultrasonic field inside the car.
- Activates if window broken or soft top opened.

5 AA 005 192-801 £123.05 **£69.95**

SHIFT-LOCK

Shift-Lock securely locks together the gear lever and the hand-brake. It gives a high level of car security which is visible to the would-be intruder. Quickly fitted and easily locked with a push-button snap lock. Simple fully detailed fitting instructions included.

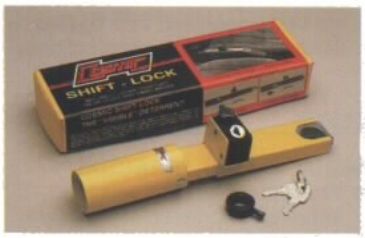
SL 2001 **Our Price £13.95**

"CUSTOM" DESIGN LOCKING PETROL CAPS — SECURITY WITH STYLE

- Styled to suit individual vehicle body designs
- High security 7 wafer locking barrel, incorporating an anti-pick device

WASO **Our Price £4.95**

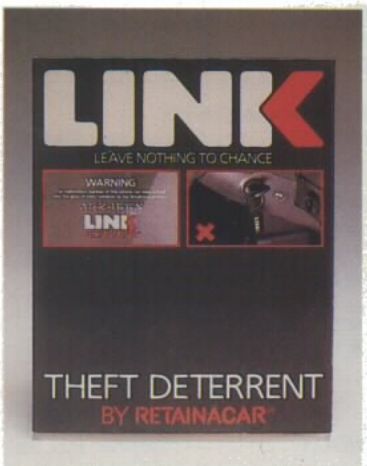
Please state model and year of car when ordering

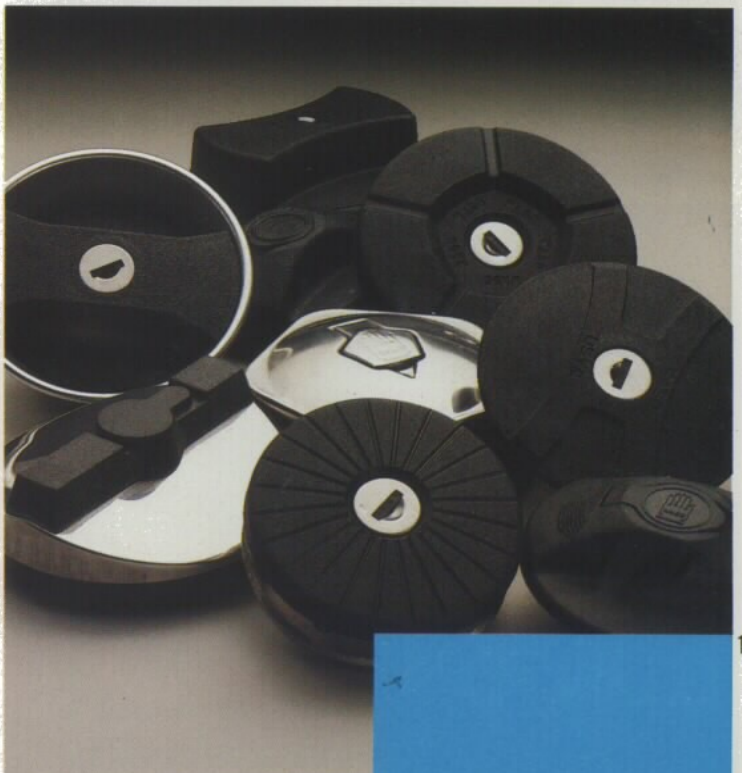


THEFT DETERRENT BY RETAINACAR

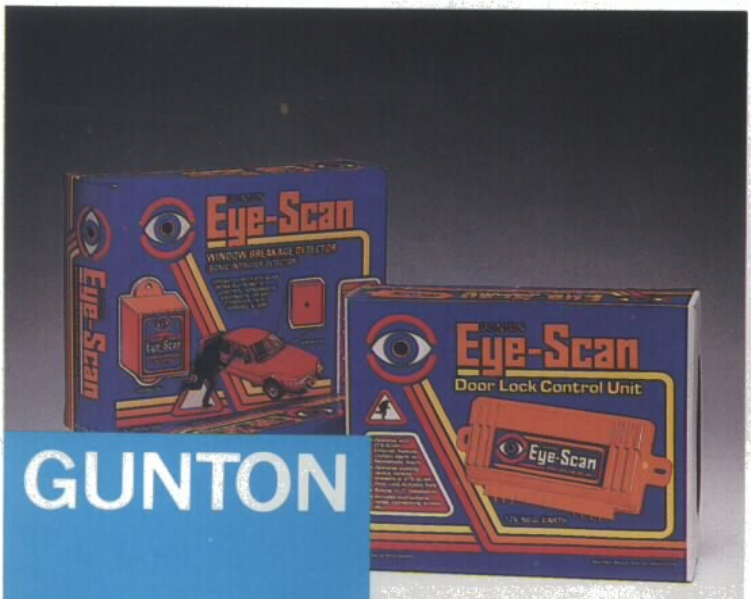
Two-way protection for the car. An etching kit personalises car windows with the registration number, while an ignition kill switch immobilises the car to deter joyriders.

LS 12011 **Our Price £8.95**





STOP THIEF!
Eye-Scan
The most Sophisticated System available
GUNTON Eye-Scan Infra-red Remote Control Car Security System



INFRA-RED REMOTE CONTROL ALARM

This incorporates a voltage-current sensing alarm system. Armed and disarmed by Remote Control.

- Coded Infra-red pulses from Key Tag Transmitter activate the Electronic Eye Module behind the windscreen.
- Electronic Eye lights up to acknowledge the Command Signal.
- Guards against unauthorised entry through Doors, Bonnet & Boot.
- Guards accessories such as Radio/Cassette Player, Spot/Fog Lamps etc.
- Flashes Headlights & intermittently blasts horn.
- The Eye-Scan Central Locking System can be connected to operate in conjunction with the alarm system.
- The Eye-Scan Aerial Vandal Detector can be fitted to activate the main alarm if the aerial is touched.
- The Eye-Scan Window Breakage Detector can be fitted to activate the main alarm.

	R.R.P.	Our Price
IRRC/1	£68.91	**£42.95**

SENSAMATIC ALARM SYSTEM

Voltage Sensing Circuit flashes headlights and intermittently blasts horn, circuit resets and rearms after one minute.

- Guards against unauthorised entry through doors, bonnet and boot.
- Guards accessories such as Radio/Cassette Player, Spot/Fog Lamps.
- Automatically armed and disarmed by ignition switch.
- The Eye-Scan Central Locking System can be used in conjunction with this alarm.

	R.R.P.	Our Price
SENS/2	£33.70	**£19.95**

EASYMATIC ALARM SYSTEM

Voltage sensing circuit flashes headlights and blasts horn. Circuit resets and rearms after one minute.

- Guards against unauthorised entry through doors, bonnet and boot.
- Guards accessories such as Radio/Cassette Player, Spot/Fog Lamps.
- Armed and disarmed by ignition switch.
- Eye-Scan Window Breakage Detector can be added to this alarm.
- Pack includes cable, connectors, sleeves, screws and step-by-step illustrated installation instructions.

	R.R.P.	Our Price
EASY/3	£20.38	**£12.95**

AERIAL VANDAL DETECTOR

- Works in conjunction with the Infra-Red and Sensamatic Alarms.
- Activates horn and flashes headlights for 4 seconds if car aerial is touched.
- Connects to aerial lead and radio socket.
- 2 single wires link to the alarm unit.

	R.R.P.	Our Price
AVD/4	£29.85	**£19.95**

DOOR LOCK CONTROL SYSTEM

- Operates in conjunction with the Infra-Red Remote or Sensamatic alarms.
- Automatically locks/unlocks doors as alarm is Armed and Disarmed by remote control.
- Operates in conjunction with original equipment. Central Locking Systems. Cars without central locking can be modified by using the Actuator Sets.

	R.R.P.	Our Price
DLC/5	£29.12	**£21.95**

DOOR LOCK ACTUATOR SETS

- Fit into door panels to operate door lock mechanism in conjunction with Door Lock Control System.
- All necessary fitting parts included.
- Fully detailed instructions to enable average D.I.Y. motorist to install.

Single Door Activator Set **DLAS/1D**	**£21.95**
Two Door Activator Set **DLAS/2D**	**£39.95**
Four Door Activator Set **DLAS/4D**	**£79.95**

Extra Sirens. 106 db. Micro/S1	**£9.95**
116 db. Ten-Ten/S2	**£16.95**

WINDOW BREAKAGE DETECTOR

- Operates in conjunction with the Eye-Scan Infra-Red Remote, Sensamatic and Easymatic Alarms.
- Simple under dashboard fixing.
- Senses shock wave if an attempt is made to break a window.

WBD/6	£29.49	**£21.95**

Audio

Audio

In-car entertainment is one of the most closely fought over sectors of the car accessory market. It is a field in which the consumer has an unparalleled choice of models from simple two-waveband radios to component radio and cassette stereo systems that come close to emulating first-class home hi-fi equipment in audio quality. To attain such high standards within a very small package able to withstand a car's harsh environment involves the use of some very sophisticated micro-circuitry. There may be as many as 30 separate control functions on some modern sets.

THE STEREO BROADCASTING EXPLOSION

Britain came relatively late to frequency modulated (FM) broadcasting and even later to widespread transmission of stereo signals. Many BBC local radio stations still only transmit a mono signal but the advent, 11 years ago, of the independent local radio stations (ILR) started an explosive growth in stereo broadcasting that will continue for the next decade. From inception the Independent Broadcasting Authority (IBA) saw the enormous potential of the car-borne audience, designed its transmitters for good mobile reception and made all transmitters stereo. The BBC has followed - many stations are now updated with stereo equipment and the special signal polarisation needed for better in-car reception. Today, there's some 30 ILRs and 24 BBC local stations on the FM airways Nine more areas will get local IBA or BBC transmissions within the naxt few months. Up to 50 more local stations have been proposed in plans extending to 1992. This rapid evolution has meant that it has quickly become very much more worthwhile to have an in-car set able to receive FM stereo broadcasts.

The ability to receive in stereo and hear a variety of stereo broadcasts across wider areas of the country is a great leap in listening pleasure. But to get even better results from your set it's worth looking at the characteristics of FM stereo signals. Long Wave and Medium Wave amplitude modulation (AM) signals have the ability to travel long distances "bending" around geographical features and reflecting from the ionosphere. As a result you experience very little variation in signal strength over many miles while tuned to AM broadcasts. FM signals have a very different character. They weaken considerably as you drive away from the transmitter and are most strongly received only when you are in line of sight with the transmitter. The FM signals bounce off hills and other major features such as buildings but they do not return from the ionosphere. Therefore the best stereo signals can only be received when you are well within the transmitter range - typically 15-30 miles depending on power output and local topography. This tight range enables the same frequency to be allocated to more than one local station provided they are well-spaced across the country. And it has also meant that to achieve almost complete national coverage for three BBC national stations a network of over 90 transmitters has been strung out all over Britain. The main causes of poor FM stereo reception are distance from the transmitter, the reception of multiple signals by direct path and by reflection from buildings or hills, and the periodic blocking of the signal by similar features of the landscape. In the case of BBC national stations it pays to hunt up the next transmitter frequency of the same programme as soon as you find there's a deterioration in signal. For reception of local stations the tail-off in sound quality marks the limits of range - you should then seek another programme. Within the wide spread of stations available you should find one to suit your tastes quite quickly. A self-seeking or scanning tuner enables you to do this with the minimum of distraction from the road ahead.

WHERE TECHNOLOGY TOUCHES ON TAPES

Few drivers are content to stick with a radio alone - separate cassette players or players combined with the radio are a major area of market expansion. While it is undoubtedly the radio that has received the bulk of the attention from electronics technologists tape players have enjoyed some considerable efforts at refinement. Many of today's players have, at the very least, a hardened playback head resistant to the use of more abrasive high quality metal and chromium dioxide tapes. Many also have a bias selector which attunes the player to these types of tape for greater playback fidelity. Most of the better players now incorporate the Dolby 'B' noise reduction system a valuable aid in reducing background tape hiss. Tape transport speed control is another area that has also benefited from electronic techniques in combination with improvments in the quality and design of mechanical parts of the mechanism. These advances have lowered levels of wow and flutter and help to combat the effects of the car's vibration. There have not been so many advances in mechanical operation, however. The widespread use of auto-reverse decks is, nevertheless, a great convenience to car drivers who need no longer be distracted by the need to identify the side to be played or turn the tape over to change sides.

YOUR CHOICE OF IN-CAR AUDIO

It is most important to view the buying of in-car entertainment equipment as the purchase of a complete system. No radio or tape-player is able to give its best performance without adequate speakers and a good quality aerial. So don't blow your last penny on the set - it is worth buying a slightly less highly featured model in the same range and spending the price difference on better ancillary (but nevertheless essential) equipment. Reviewed below are the main types of equipment that can be matched in a comprehensive car audio system.

COMBINATION UNITS

Much the largest sector of the market is the combined radio/tape-player or combination unit. Although several of the latest models are built to the new size standard the majority of these sets conform to normal DIN in size and type of mountings so they fit in the fascia of most cars well within reach of the driver. While the size of the combination unit does limit the number of features on sets in some makers' ranges there are, nevertheless, a few sets that resemble a piece of aircraft equipment in their complexity. They have most of the functions you can obtain in a component system and often have a separate amplifier - the disadvantage may be that some of the controls are so small they can be difficult to operate. Just recently a few combination units with relatively high power outputs - sufficient to drive four speakers - have become available. However, most combination units have outputs in the range 5-10 watts maximum and this is only sufficient to drive one speaker pair adequately. To drive four speakers the output of most units need boosting by a power amplifier or graphic equaliser/amplifier. An output of about 15W/per stereo channel is the minimum that should be aimed for.

SPEAKERS

All the major manufacturers of car audio equipment offer two ranges of speakers. The widest choice is in flush, panel-mounting speakers designed for mounting in doors or other trim parts where they can take advantage of the added resonance of the cavity behind the trim. Surface mounted, enclosure or pod speakers are principally designed for the rear parcel shelf with the speaker or multiple speakers angled forward for good sound projection. In both ranges the speakers may have single, dual or triple cones, the last two types being designs for a wider frequency response. Multiple speakers, either purchased as a panel-mounting set or in an enclosure are usually all of the single cone type. They operate best with a crossover network which filters to each speaker the frequency range that it is designed to handle. Choose speakers that have a maximum power handling capacity which is about 50% more that the maximum power rating of your car audio equipment for best results. Study mounting positions carefully - you must prevent door speakers from fouling window mechanisms and from becoming damp. The higher in the door the better as higher frequencies are not sustained over long distances and can be absorbed by seat upholstery and carpeting. At the rear, speakers mounted through the parcel shelf or load cover give good results in the bass registers owing to the large cavity of the boot. Since there is little directionality of bass frequencies and they add little to the effect of the stereo separation woofers can be mounted more centrally than the high frequency tweeters - these should always be at the outside edge of the rear shelf.

AERIALS

Although higher-priced aerials may look little different from much cheaper alternatives do spend as much as you can afford on the antenna. Better quality aerials are more resistant to corrosion, have finer tolerances at key points like sliding joints and will sustain maximum performance for far longer than bargain basement items. Aerials work best furthest from the engine where they are less likely to pick up the most common causes of interference such as the ignition system and the generator. On the roof or the rear wing are often the best places despite car manufacturers' insistence on providing an aerial hole on the front wing. Make sure there is an excellent earthing connection between the aerial base and the car body and that any joints in aerial extension leads are made with proper shrouded coaxial connectors. Buy a kit of suppression parts for your car - for the majority of cars a suppression choke in the main car audio power lead and capacitors on the ignition coil and generator stop most noises.

BIB AUTOMATIC CASSETTE HEAD CLEANER

Regular cleaning makes a surprising difference. The more you use your cassette player, the more the clarity and quality of sound diminishes. Oxide particles shed from passing tape and combine with air-borne contaminants, such as dust, tobacco smoke and traffic fumes which creates harmful residues which accumulate not only on your tape-player's head but also the guides, pinch roller and capstan. Left to accumulate, these deposits create a gap between the head and the tape substantially reducing the quality of sound.

The Bib Automatic Head Cleaner Ref 211 uses a new method of cleaning to ensure harmful contaminants are removed. The pack contains mechanical head cleaning cassette, aerosol containing special tape-head cleaning fluid, replacement felts and library case. There is also a useful wallet for convenient storage.

FILTER KING

The well known fuel saver from Malpassi. Tests and trials as well as many satisfied customers claim savings of 10%–15%.
The Filter King regulates the pressure of fuel delivered by the car's petrol pump to help maintain a steadier float level in the carburettor thus preventing expensive fuel surges and flooding. Its effective filter acts as an extra benefit to trap any dirt or water which may contaminate the petrol supply.
The Filter King is fitted as standard by Alfa Romeo and Maserati. 100s of thousands sold worldwide already.
The relentless increase in the cost of motoring means that any aid to fuel economy must be considered an essential fitment.
Not suitable for cars with fuel injection.

MG 3120 **Our Price £19.95**

ARMADILLO

Armadillo patented Liners enable you to carry foods, tools, merchandise, building materials — even pets in your car with ease. Then in seconds, converts back with no interior cleaning necessary to a passenger carrying vehicle. Specially designed for hatchbacks, estates and vans. CATS CLAWS

A pair of useful 'claws' to stop your car mats sliding forward. Easily fitted in minutes. Unique concept.

ER 8001 **Our Price pr. £4.95**

JETBAG

TAIFUN

The Taifun holds great appeal to all true ski enthusiasts, as 5 pairs of skis with sticks, 5 pairs of boots, and several suits can be packed in comfort.
If required two Taifuns can be mounted side by side. For this reason the Taifun has two ordering numbers — one for left hand opening and one for right hand opening.

© Copyright — Carnoisseur Ltd.
This catalogue is sold subject to the following conditions: that it shall not, without the written consent of the publishers first being given, be lent, resold, hired out or otherwise disposed of in a mutilated condition or in any unauthorised cover by way of trade, nor affixed to or as part of any publication or advertising literary or pictorial matter whatsoever.

Our Policy

SATISFACTION GUARANTEED

We want you to be pleased with all goods bought from Carnoisseur. Your guarantee of satisfaction is that any item supplied by us that does not meet with your approval may be returned within fourteen days for either exchange or a full refund.

DESPATCH

Most orders are processed the day they are received and despatched within 48 hours. You will be notified if your order or part of your order is subject to unusual delay.

PRICES

In the past years most of our printed prices have been maintained for a full twelve months after publication of the Carnoisseur catalogue.
Occasionally, however, cost changes are inevitable due to inflation and exchange rate fluctuations on imported goods. We therefore reserve the right to change prices without notice. During the later months in the year up to date price amendment lists are available.

SPECIAL OFFERS

From time to time we are able to take advantage of special buying conditions and to pass on to our customers the resultant savings in the form of special price reductions.
You will automatically be credited with any over-payment you might have made in ordering goods that are currently on special offer.
If at any time you want a current special offer list, please send a large stamped addresed envelope to Carnoisseur, Dept. SO.

ORDER QUERIES

Please first check for our comments on all documents enclosed with your order.
A quick telephone call to (0582) 471700 will in most cases be the simplest and most efficient way of answering any queries that may arise from your order.
Please have ready the sales invoice supplied with the goods and ask for the Customer Service Manager whose first responsibilities are to look after you.

BACK ORDER/CREDITS

We endeavour to hold good stocks of most listed items at all times. If for some reason we are unable to supply a particular item with your order we may
a) back order that item and send it on as soon as it is available or
b) if long delays are expected, cancel this part of your order and refund you or notify you that your account is in credit; you may choose to ask for a refund or use the credit as part payment for your next order.

VAT

Although many customers have remarked that they would prefer our prices to include VAT, unfortunately our past experience has shown that this approach causes enormous problems if the rate of VAT is altered after publication of the catalogue. For this reason we consider it preferable to exclude VAT. It also makes ordering simpler for our many overseas customers who are not required to pay VAT.

LET US KNOW

If any aspect of our service has not met with your approval, we are anxious to know about it. Write to Philip Hammond, Managing Director, and your letter will receive prompt personal attention.

Steering Wheels

Leather Steering Wheels and matching Gear Knobs by Raid of Italy.
